

The most affordable Unified™ systems

4-Jack and 6-Jack Unified™ Jacking Systems

- Four or six Unified™ jack outlets and four helper outlets (for more capacity you can use two or more jacks per Unified™ outlet)
- Dump valve for easy self-retraction of spring return crib jacks, extra outlets on manifold for use with double-acting jacks
- Four jack machine will extend four tall crib jacks over 16 inches in less than one minute with 5.5hp engine, six jack machine will extend four tall crib jacks in less than 45 seconds with 13hp engine with the standard pump, larger output pump setups are available
- High quality German made ball valves that are easy to operate and have easily replaceable seals
- Ball valves in all locations (unified, outlet, helper, dump and zone valves) or with needle valve helper outlet controls, needle bleeder valves and electronic remote controls also available
- Movable outlet manifold allows hoses to run off of the front of the machine beside the gauge panel, or off of either side of the machine, keeping the hoses out of the operator's way
- Bright and easy to read digital display shows the jack travel in 10ths of an inch
- Simple, user-friendly gauge panel with large, easy to read and easy-to-replace pressure gauges
- 4-Jack machine available in a 4'x5' frame size, 6-jack measures 4'x8', and both are available rated for 10,000 psi operating pressure and in double-stroke versions
- Accessories: Jack and jack base storage racks, variable speed hydraulically operated hose reel which allows one man to reel hoses in and out
- Two or more machines can be placed side by side and operated together to raise large loads
- 5.5hp Honda engine standard, electric start optional, 13hp electric start engine available
- These are the most compact and inexpensive Unified™ Jacking Systems that you can buy
- The perfect step up from a Power Pack, or save money and leave off the engine and pump and use your Power Pack to operate either machine!
- The base four jack machine only is priced at \$19,850, the package with four jacks and eight 30' hoses is \$27,400.
- The base six jack machine only is priced at \$29,750, and the package with six jacks and twelve 30' hoses is \$41,100.
- Choose from manual controls via ball or needle valves, or specify our electronic remote control system, the first in the industry!

Some talk about bringing improvements to the structural moving industry, we actually do it!
